Skills

- Full-Stack Architecture
- PHP & Laravel Framework
- Frontend (HTML5/CSS3/JS)
- Database Design (MySQL)
- RESTful APIs & Backend
- Problem Solving & Logic
- Git & Version Control

Certifications

- Web Development Cert (2024)
- Laravel Framework (2024)
- MySQL Database Design (2023)

About Me

Passionate BSIT student and aspiring Full-Stack Developer with solid expertise in modern frontend technologies, PHP, Laravel, and MySQL database management. Adept at transforming complex requirements into clean, high-performance web applications with exceptional UI/UX standards and robust system architecture. Seeking developer opportunities to leverage skills and contribute to impactful software projects.

Education

- BS in Information Technology
- 2022 — Present
- College of Information Technology
- Senior High School (TVL-ICT)
- 2020 — 2022
- Information & Comms Tech Track

Experience Timeline

- Full-Stack Developer
- 2026 — Present
- Full-Stack Web & Software Engineering
- Building production-grade web applications, commercial space management systems, and RESTful APIs using React, Python, PHP, and Laravel.
- Integrated interactive GIS mapping functionality and role-based authentication systems.
- Advanced Application & Systems Development
- 2025
- Using Different Applications for Development
- Engineered CPDO municipal planning software with role-based access control (RBAC) and MySQL database architecture.
- Implemented real-time analytics dashboards and automated administrative report generation.
- Learning New Programming Languages
- 2024
- Multi-Language Software Engineering
- Developed ANWATCH luxury watch e-commerce web platform using PHP & MySQL.
- Engineered desktop payroll automation software using Visual Basic .NET with automated tax & salary calculation modules.
- Learning & Improving Core Programming Skills
- 2022 — 2023
- BSIT Degree & Self-Directed Coding
- Started Bachelor of Science in Information Technology; mastered core fundamentals of HTML5, CSS3, JavaScript, PHP, and database design.
- Starting Learning Programming & Web Development
- 2022
- TVL-ICT Senior High School Track
- Began coding journey during Senior High School in the TVL-ICT strand, built first web applications, and graduated with honors.
